Profile

Mobile Application Developer with over 5 years of experience in Flutter and Dart. Skilled in developing scalable applications, integrating APIs, and applying clean architecture principles. Experienced in both corporate projects and startups, with a proven ability to contribute to innovative teams and deliver high-quality solutions.

Technologies

Core: Flutter & Dart (advanced, custom widgets, animations, performance optimization)

State Management: BLoC, Provider, Riverpod

Backend & Data: REST API, GraphQL, WebSocket. Databases (Drift, Hive, SQLite). Firebase (Firestore, Cloud Messaging, Crashlytics)

DevOps & Tools: CI/CD: GitHub Actions, Codemagic. Git, Github

Other: Performance Optimization, Modular & Scalable Architectures, Multi-language & Localization

Experience

Senior Flutter Developer *Lalaku*

Tashkent, Uzbekistan

Oct 2023 – Present

- Leading the mobile development team, responsible for architecture design, code quality, and project delivery.
- Successfully developed and deployed 6 enterprise mobile applications, currently used by 2,000+ active users across the company's operations.
- Applications cover the company's end-to-end business process, including:
 - * Agent App – used by field agents to register client orders.
 - * Expeditor App – used for order delivery, payment collection, and client debt tracking.
 - * Warehouseman App – manages stock levels, product acceptance, and order processing.
 - * Auditor App – enables monitoring of client-side product availability, agent performance, and client feedback.
 - * Supervisor App – enables real-time tracking of field teams, route compliance, and sales target execution.
 - * Cash Collector App – manages cash reconciliation, field payment pickups, and daily transaction audits.
- Implemented BLoC state management and Clean Architecture principles to ensure scalability and maintainability...
- Integrated REST APIs with secure Authentication & Authorization (role-based access).
- Added Offline-first support, allowing apps to work seamlessly without internet and sync automatically once reconnected.
- Implemented Push Notifications (Firebase Cloud Messaging) for real-time updates.
- Developed multi-language localization to support diverse user groups.
- Optimized performance and improved user experience, reducing manual errors and enhancing transparency in order and stock management.

Flutter Developer (Project-based) *Usoft LLC*

External Project –

Wisdom Dictionary (Online dictionary & word game app with 1M+ users)

Remote/ Part Time 2024

– 2025

- Optimized database synchronization, significantly reducing processing time and improving app performance.
- Implemented OAuth authentication (Google, Facebook, Apple).

- Integrated Yandex Ads for in-app monetization.
- Fixed bugs and improved gameplay in route map-based levels and multiplayer battle mode.
- Developed in-app purchase (tariff/plan system) to support monetization.

Mobile Developer → Mobile Team Lead *Thinkland LLC*

Tashkent, UZ
Sept 2020 – Aug 2023

- Worked on multiple mobile applications from scratch to production, successfully published on Google Play and App Store.
- Promoted to Mobile Team Lead in late 2022, leading a team of developers and overseeing the full mobile development lifecycle.
- Actively collaborated with backend, QA, and product teams to deliver scalable, user-friendly, and performant applications.

Selected Projects:

- Avione. (Flight & train ticket booking app)
 - * Built with Flutter (BLoC architecture), gRPC, and B2C services for payments & booking.
 - * Successfully launched on Google Play and App Store.
 - * [Google Play Link](#) — [App Store Link](#)
- KPI.COM Mobile – Comprehensive Business Process Management App
 - * Provides an all-in-one solution for Accounting & Finance, HR & Payroll, Sales & Marketing, Project Management, and Business Analytics.
 - * Built with Flutter, integrated with complex backend services and designed for enterprise-scale usage.
 - * [Google Play Link](#) — [App Store Link](#)
- Bir Qadam – E-commerce & Delivery App
 - * Enables users to purchase products online with integrated delivery services.
 - * Built with Flutter, using BLoC, Dio, and GetIt for scalable and maintainable architecture.
 - * [Google Play Link](#) — [App Store Link](#)
- Sevimli Lavash – Food delivery application
 - * Allows users to order meals online and track order status in real time.
 - * Developed with Flutter and REST API, integrated push notifications and online payment systems.
 - * [Google Play Link](#) — [App Store Link](#)

Education

Tashkent University of Information Technologies (TUIT)
Bachelor's Degree in Software Engineering

2018 – 2022
